

Step 1: Create the Customer table with customer ID, name, phone number and email details.

The screenshot displays a database management interface. The top section shows a SQL script in a text editor. The script consists of two parts: a `CREATE TABLE` statement for a table named 'Customer' and an `INSERT INTO` statement. The `CREATE TABLE` statement defines four columns: `Customer_ID` (INT, PRIMARY KEY), `Customer_Name` (VARCHAR(100)), `Phone` (VARCHAR(15)), and `Email` (VARCHAR(100)). The `INSERT INTO` statement adds five rows of data, each with a unique `Customer_ID` and corresponding name, phone number, and email address.

Below the script, the 'Result Grid' shows the data inserted into the 'Customer' table. It is a table with four columns: `Customer_ID`, `Customer_Name`, `Phone`, and `Email`. The data rows are: (101, Rahul, 9876543210, rahul@gmail.com), (102, Priya, 9876543211, priya@gmail.com), (103, Arun, 9876543212, arun@gmail.com), (104, Sneha, 9876543213, sneha@gmail.com), and (105, Kiran, 9876543214, kiran@gmail.com). The last row shows NULL values for the first three columns.

On the right side, a tooltip message states: "Automatic context help is disabled. Use the toolbar to manually get help for the current caret position or to toggle automatic help."

At the bottom, the 'Output' section shows a log of database actions. It includes error messages for failed `CREATE TABLE` and `INSERT INTO` operations on a table named 'Account', followed by successful messages for the `CREATE TABLE` and `INSERT INTO` operations on the 'Customer' table, and a final message for a `SELECT` query.

#	Time	Action	Message	Duration / Fetch
1	18:15:07	CREATE TABLE Account (Account_No INT PRIMARY...	Error Code: 1824. Failed to open the referenced table 'cust...	0.016 sec
2	18:16:32	INSERT INTO Account (Account_No, Customer_ID, Acco...	Error Code: 1146. Table 'p_week1.account' doesn't exist	0.000 sec
3	18:17:18	CREATE TABLE Customer (Customer_ID INT PRIMAR...	0 row(s) affected	0.031 sec
4	18:17:31	INSERT INTO Customer (Customer_ID, Customer_Name, ...	5 row(s) affected Records: 5 Duplicates: 0 Warnings: 0	0.016 sec
5	18:17:45	SELECT * FROM Customer LIMIT 0, 1000	5 row(s) returned	0.000 sec / 0.000 sec

Step 2: Verify the Customer table and display the inserted customer records.

```
19
20 • CREATE TABLE Account (
21     Account_No INT PRIMARY KEY,
22     Customer_ID INT,
23     Account_Type VARCHAR(20),
24     Balance DECIMAL(12,2),
25     Branch VARCHAR(50),
26     FOREIGN KEY (Customer_ID)
27         REFERENCES Customer(Customer_ID)
28 );
29 • SELECT * FROM Account;
```

✓	49	18:34:39	CALL GetCustomerFullDetails(101)	1 row(s) returned

Step 17: Create GetCustomerFullDetails() and GetTotalCustomerBalance() to retrieve complete customer and balance information.

354 BEGIN

355 SELECT

356 Customer_ID,

357 SUM(Balance) AS Total_Balance

358 FROM Account

359 WHERE Customer_ID = p_Customer_ID

360 GROUP BY Customer_ID;

361 END //

362 DELIMITER ;

363 CALL GetTotalCustomerBalance(101);
